

MID CARE

Integrated Healthcare Ecosystem Platform

Prepared by: Mariam Ahmed Mubarak Basher

Supervisor: Dr. Abdulrahman Al-Azzi

Lebanese International University (LIU)

Executive Summary

MID CARE is a healthcare ecosystem connecting patients, hospitals, pharmacies, volunteers, and healthcare providers.

Objectives

Improve accessibility, coordination, emergency support, and medication management.

Main Features

AI Assistant, QR Verification, Identity Verification, Analytics Dashboard, Medical Records, Notifications and Appointments.

Architecture

Presentation Layer → Application Layer → Business Layer → Database Layer → Cloud Infrastructure.

Security

Authentication, Authorization, Encryption, Backup and Recovery.

Business Impact

Improved efficiency and resource utilization.

Social Impact

Better accessibility and community healthcare support.

Portfolio

Founder and System Designer: Mariam Ahmed Mubarak Basher.
